David Cerezo Hernández
Full stack web developer

ABOUT ME

I am a professional transitioning to the web development sector, with a solid work experience in other fields that has strengthened my ability to adapt to different environments and challenges. My strong commitment to learning and growth in frontend and backend technologies drives me to face new challenges in the development of dynamic and scalable web applications. I am known for my perseverance and dedication to overcoming obstacles and achieving goals. This previous experience has taught me to quickly adapt to changes and new environments, which allows me to approach projects with flexibility and efficiency.
